FACE-TO-FACE

Anaesthetic Crisis Resource Management

Broaden your understanding of Human Factors and their impact on clinicians and patient safety in anaesthetic crises.

Study the interrelationships between humans, the tools and equipment they use in the workplace and the situations in which they work.

Identify and challenge your concepts of cognitive bias. Learn why situational awareness is critical in crises and how it can significantly impact decision making in complex healthcare environments.

Participants in the ANZCA and FPM CPD program may claim this course as an emergency response activity in their CPD portfolio.
